SUMMARY

- Strategy & Analytics professional with 6+ years translating market signals, consumer behavior, and business performance data into growth, pricing, and investment decisions.
- Built forecasting, business performance, and demand-planning frameworks across an \$11.3B multi-marketplace portfolio, informing resource allocation, pricing, and revenue growth strategies.
- Leverage SQL, Python, Excel, Tableau, and Power BI to translate complex datasets into executive recommendations, market insights, and measurable business outcomes.

EXPERIENCE

DaVita | Sr. Financial Analyst – Revenue Analytics

Mar 2026 - Current

- Own long-term forecasting frameworks across 5 healthcare marketplace plans within an \$11.3B portfolio, informing pricing strategy, growth targets, and resource allocation decisions.
- Converted regional market rates, enrollment trends, and utilization benchmarks into financial targets used by operational teams to drive performance outcomes.
- Identified growth opportunities through competitor analyses, regional benchmark, market expansion modeling, and expected-value assessments, influencing \$1.4M in strategic funding decisions.
- Evaluated commercial opportunities and strategic partnerships by quantifying revenue impacts, financial viability, and user behavior outcomes to prioritize capital allocation.
- Modeled member behavior and demand patterns across marketplace plans, uncovering \$420K in forecast-to-actual variances and improving planning accuracy.

NYDEC | Business System Analyst – Finance Data Management

April 2025 – Feb 2026

- Extracted digital license sales data from AMS portal, modeling pricing trends and customer demand patterns using Python and Excel, informing pricing adjustments that drove a 4.5% increase in license value.
- Analyzed NYDEC digital license sales performance through the Walmart retail channel, identifying demand patterns and growth trends that informed strategies supporting 17% channel revenue growth.
- Evaluated investment requirements and built business cases for a digital payment platform, improving project delivery timelines by 20% and aligning cross-functional stakeholders on priorities.
- Delivered executive insights on digital commerce performance, growth pattern, and investment priorities to senior leadership across 5 business units.
- Developed 15+ business cases and automated Python and VBA reporting workflows, reducing quarterly close effort by 85% and strengthening financial controls.

7FinCorp Group (Investment Banking Advisory Firm) | Sr. Financial Analyst

Oct 2018 - Jul 2022

- Owned financial modeling and investment evaluation workstreams across 18+ M&A and ECM transactions, informing executive decisions and contributing to \$3M in executed revenue.
- Led unit economics, pricing, and break-even assessments for new advisory products, identifying \$150K in unrecovered vendor costs across 18 mandates.
- Spearheaded deal performance reporting and revenue analytics infrastructure using SQL and Power BI, reducing reporting effort 60% and improving leadership visibility.
- Directed industry, market, and competitive intelligence analyses for transaction evaluations, enabling leadership to assess growth opportunities, risks, and investment priorities.
